

Good morning WHS Parents and Families,

The importance of daily engagement in learning and the maintenance of learning routines cannot be overstated. While we cannot replicate the learning experiences students are afforded when learning in our schools, there is a large variety of resources that can keep them cognitively engaged. In response to the prolonged closure of our schools, our teachers will be providing suggested online learning opportunities for the students in each of their classes using their online platforms (ex: Google Classroom, Schoology, etc). Teachers will be posting suggested assignments/opportunities every few days. At this time the assignments are not mandatory and will not be graded but we strongly encourage students to engage in this work.

If your student is having difficulty accessing the online platform for a specific class, please email the teacher directly. If you need assistance with iParent or iStudent, please contact Mrs. Indrisano at mindrisano@winthrop.k12.ma.us. Our Guidance Counselors are also available via email to respond to academic questions and/or concerns. Please be sure to check both the district and high school's website regularly for updates.

[Click here](#) for a list of all WHS teachers (including contact information), their courses, and the online learning platform that they are using to provide learning opportunities for their students.

Please let me know if you have any questions or concerns. Thank you.
